Landscape Photography - Do We Need Filters Anymore?

Capturing the vibrancy of changing seasons has always meant something special to me. Even with the advances in digital photography and processing, it's advantageous when shooting autumn landscapes to use optical filters to capture the beautiful colors, tones and hues that abound in the fall.

Our History – Heliopan Filters

The filter blocks UV light and removes the blue cast from images taken in very bright sunny conditions . This argument is almost completely spurious for modern digital

Where To Download Filters For Digital Photography Heliopan

cameras. With old film cameras it was often necessary to use a UV filter because film is extremely sensitive to UV light.

Heliopan Filter: Open Talk Forum: Digital Photography Review

My thoughts on using Polarising filters, ND Grads and ND filters with all that digital technology offers these days. I discuss Hi-tech, Nisi and Lee filters....

heliopan digital - Digital Photography Review
Since digital photography is all about the quality and intensity of light, lens filters are often necessary to modify the light before it enters the lens. Many photographers think that some of the built-in tools in Lightroom and Photoshop can simulate filter behavior, making filters redundant in the digital age.

Amazon.com: heliopan filter

If, on the other hand, we use a green filter the result is the exact opposite. The result would be lush green leaves and dark cherries.
Yellow filter Yellow filters are a basic filter for black and white photographers, and do their best work with landscape and plant images. The images look natural and are not overly dramatic.

Best Filters For Fall Color Pictures -
Outdoor Photographer

This heliopan 'digital filter' apparently is
a high quality filter; it removes both UV and
IR. Heliopan says that the filter actually
improves IQ, both by increasing sharpness and
color separation. What do you think?

Lens Filters Explained - Photography Life
The filter I use is the Hoya 58mm DMC PRO1
Digital Multi-Coated UV (Ultra Violet)
Filter. Keep in mind though, that poor
quality UV filters are a common cause of lens
flare. Polarizing Filter. Polarizing filters
are really useful, because they reduce glare,
and improve the saturation of photos.

Filters For Digital Photography Heliopan
HELIOPAN Infrared Filters A very interesting
area in digital photography is infrared
images for creative and artistic effects.
Heliopan filters made from Schott glass, pass
only the exact areas of the IR Spectrum:
RG695(89B), RG715(88A), RG780(87), RG850,
RG1000. For digital landscape pictures we
recommend the R715 to RG830 filters.

radiation in order to achieve greater color separation and more accurate color reproduction. By passing only the visible spectrum, digital capture is more accurate when photographing in artificial lighting conditions.

Not All Lens Filters Are The Same -
Photography Life

I believe some of their filters specify for digital, but not all. Is that right? I am now the proud owner of my first Heliopan filter (77 mm 81B slim version). After all the hoopla about German glass, I thought I would give it a go. All my other filters are Hoya super multi coated and I am wondering if I would have been better off sticking to that.
