Specific Heat of Metals - Chemistry

My students enjoy working with the small-scale lab activities. For the most part, the 41 labs use fewer materials and very small amounts of reactants (hence the name "Small-Scale"). Set-up time is usually less than setting up for the full lab activities in the related Chemistry Lab Manual.

Solutions Manual for Small Scale Approach to Organic ...

Traditionally, experiments in organic chemistry are carried out on a macroscale level, employing quantities of chemicals on the order of 5-100 g, using glassware designed to contain between 25 and 500 mL of liquids. For quantities of materials in the 0.005-0.5 gram range, one employs different, "microscale" techniques and equipment in order to carry out the various standard organic laboratory ...
